 BAKER & CONDON, "Dipeptide isosteres. 1. Synthesis of dihydroxyethylene dipeptide isosteres via diastereoselective additions of alkylolithium reagents to *N,N*-dimethylhydrazones. Preparations of renin and HIV-1 protease inhibitors transition-state mimics," *J Org Chem* 58:3277-3284 (1993).

 BAKER, et al., "Nonpeptide renin inhibitors employing a novel 3-Aza (or oxa)-2,4-dialkyl glutaric acid moiety as a P<sub>2</sub>/P<sub>3</sub> amide bond replacement," *J Med Chem* 35:1722-1734 (1992).

 BENNETT, et al., "The synthesis of novel HIV-protease inhibitors via silica gel assisted addition of amines to epoxides," *SYNLETT* 9:703-704 (1993).

 DREYER, et al., "Inhibition of human immunodeficiency virus 1 protease in vitro: rational design of design of substrate analogue inhibitors," *Proc Natl Acad Sci. USA* 86:9752-9756 (1989).

 MARINIER, et al., "HIV-1 protease inhibitors: ketomethylene isosteres with unusually high affinity compared with hydroxyethylene isostere analogs," *Bioorganic & Medicinal Chemistry* 2(9):919-925 (1994).
